Craymanor Limited were delighted to be involved in the design and construction of the refurbishment and extension of this existing substantial house in Sidcup.

The original design criteria was to provide a two storey side extension which enabled the creation of a large second reception room together with a new master bedroom complete with en-suite.

As the scheme developed it was then decided to include for a new loft conversion enabling two new bedrooms and a bathroom at second floor level together with providing access to steel and glass framed balconies.

The property is in Metropolitan Green Belt and therefore the design of the loft conversion had to be carefully negotiated with the planning office to ensure that it complimented the existing house and the Metropolitan Green Belt designation.

Additional daylight was provided to the first and second floor landing by installing a triple velux light unit together with bespoke oak dividing sections.

The work here has provided our clients with a substantial seven bedroom home, offering substantial living accommodation together with providing excellent value for money.
